

If you like to build, this is the Cluster for you. From initial planning through surveying, assembly, maintenance, and repair and restoration, the Architecture and Construction Cluster features careers that encompass the full cycle of creating every imaginable kind of structure, including roadways, landscapes, and other building projects. The cluster is huge—with more than 13 million jobs in the US alone—and the prospects for employment are generally favorable. These careers typically require a strong foundation in math, science, and technology, and the educational requirements vary from skill certification programs through postgraduate work.

Other Career Possibilities:

Contractor, Carpenter, Architect, Plumber, Electrician,
Heavy Equipment Operator
