Executive Summary
Introduction

Every school has its own story to tell. The context in which teaching and learning takes place influences the processes and procedures by which the school makes decisions around curriculum, instruction, and assessment. The context also impacts the way a school stays faithful to its vision. Many factors contribute to the overall narrative such as an identification of stakeholders, a description of stakeholder engagement, the trends and issues affecting the school, and the kinds of programs and services that a school implements to support student learning.

The purpose of the Executive Summary (ES) is to provide a school with an opportunity to describe in narrative form the strengths and challenges it encounters. By doing so, the public and members of the school community will have a more complete picture of how the school perceives itself and the process of self-reflection for continuous improvement. This summary is structured for the school to reflect on how it provides teaching and learning on a day to day basis.
Description of the School

Describe the school’s size, community/communities, location, and changes it has experienced in the last three years. Include demographic information about the students, staff, and community at large. What unique features and challenges are associated with the community/communities the school serves?

Located in Hall County, approximately sixty miles north of Atlanta, Mount Vernon Elementary was established in 1993 on what was once rolling pastureland. The first Mount Vernon School dates back to the 1800’s and at one time stood less than a mile from the present site. One of 20 elementary schools in the Hall County School system, Mount Vernon was formed in 1993 to ease overcrowding at two local schools. In Spring of 2003, ten new classrooms were added, followed by an expansion of the current lunchroom and gymnasium.

In the Spring of 2002, Mount Vernon was named a Georgia School of Excellence, one of only nine elementary schools in the state to receive the honor. The visiting committee at that time acknowledged that teamwork between community and school is one of our strongest assets. This continuing partnership ensures that our students are provided with the best possible education as we began to pursue a charter school initiative. In spring of 2012, Mount Vernon was granted official charter school status by the Georgia Department of Education. Our new conversion charter school was voted upon and named The Mount Vernon Exploratory School.

The current student population at Mount Vernon is 655 students. We serve students in kindergarten through fifth grades. We serve a wide variety of varying needs of our students through inclusion, co-teaching, and resource classrooms.

There is a growing desire among the parents of Hall County students for schools that are innovative and break the mold of traditional education. Gaining acceptance to colleges and universities is becoming increasingly competitive, along with the job market. It is our desire to give our students an edge to skills that are lacking for colleges and careers, which research shows are collaboration, problem solving, communication, and higher level thinking, which are the very reasons we choose project-based learning as our charter initiative. Through our charter, it is the mission of The Mount Vernon Exploratory School to offer students extensive opportunities to build authentic learning experiences through project-based learning, best practice instruction, and using 21st Century cutting edge tools of technology. There is also a growing trend among our economically disadvantaged students lacking “real world” connection and communication skills. The subgroup of economically disadvantaged students at MVES has grown 14% over the past six years. As this subgroup population trend continues with the declining economy, students need more exposure to applied learning opportunities.
School's Purpose

Provide the school's purpose statement and ancillary content such as mission, vision, values, and/or beliefs. Describe how the school embodies its purpose through its program offerings and expectations for students.

Mission
It is the mission of The Mount Vernon Exploratory School to offer students extensive opportunities to build authentic learning experiences through project-based learning, best practice instruction, and using 21st Century cutting edge tools of technology.

Mount Vernon Elementary School LEADS

Mission Statement:
Motivating,
Valuing, and
Empowering
Students for success

Vision Statement:
At Mount Vernon Elementary, the team of students, staff, parents, and community:
Learns together
Enriches lives
Advances knowledge
Develops futures
Strives for success

Belief Statements:
We believe:
1) Each student has the right to a safe, orderly, and supportive learning environment.
2) All students can learn, achieve, and succeed while respecting the uniqueness of others.
3) Teachers and staff members will plan curriculum and instruction based on each child’s learning needs.
4) Technology will support our students in becoming successful, lifelong learners.
5) The partnerships among parents, educators, students, and the community are vital to our success.
6) We will provide authentic and challenging learning experiences for all students.
7) Education is an on-going process that will prepare students for success in a continuously changing society.

Our charter school status and goals allow for project-based learning opportunities with specific waivers in scheduling and allowing students outside of our attendance zone. Project-based learning provides opportunities for students to explore real-world issues and questions and to make decisions about how they will find answers and solve problems. Students’ activities will be constructive and purposeful and allow them to develop independence and responsibility. Children who are excited about what they are learning dig more deeply, expand their interests, and retain what they have learned. They make connections and apply their learning to other problems. This approach allows them to collaborate, build social skills, solve problems, and think critically.
Notable Achievements and Areas of Improvement

Describe the school’s notable achievements and areas of improvement in the last three years. Additionally, describe areas for improvement that the school is striving to achieve in the next three years.

--Partner in Education with Home Depot- providing student display boards for hallways and plans for outdoor science lab.
--Increase in science and social studies CRCT scores across the board due to PBL units
--5th grade increase in CRCT "exceeds" scores due to authentic learning experiences through PBL and Enrichment Clusters
--Established a central science lab for community members and parental partnership/involvement. This will allow students to learn from "experts in the field" and experience authentic learning.
--National and International Consultants for Professional Development: Partnership with Tech-4-Learning- 100% staff participation in PBL training; Tony Vincent 100% staff participation in technology integration.
--Due to charter funding, we were able to provide technology devices to students: laptops at a 4:1 ratio (formerly 28:1) plus additional technology supports (microphones, digital microscopes, cameras- still & video, iPods in every Kindergarten class, Sifteo cubes for gifted program to increase problem solving/creative thinking, science data hubs to collect real life data and interfaces with Google Maps to compare the data.
--Visited charter schools in San Diego, CA and building partnerships with those schools.
--Updated school website to create "real time" communication
--a 2nd grade MVES student, Sarah Morris, was featured on the CBS Morning News-Atlanta for state recognition on her PBL project on health and fitness
--a 5th grade MVES student, Trey Grimsley, was named “Georgia Association of Gifted Children- Student of the Year” for his work with PBL and gifted classes.
--Coordinated and facilitated a community "Math Mania" competition between 5 local elementary schools (similar to MathFest competitions in the state of Georgia) for the past two years

Areas for improvement:
--Increase math achievement/growth scores to be more equitable with our reading/language arts achievement.
--Increase our percentage of students scoring in the "exceeds" category across the board in all academic areas.
--Establish a literacy garden with outdoor learning stations.
--Establish an outdoor science lab to enhance our current indoor science lab.
--Build more partnerships with professionals in all career fields to learn from "experts in the field."
Additional Information

Provide any additional information you would like to share with the public and community that were not prompted in the previous sections.

Enrichment Clusters- from clubs to interest-based inquiry projects: Our Enrichment Clusters have evolved from "student clubs" to project-based learning. This involves all grade levels K-5 students participating. Enrichment Clusters (EC's) take place during the school day for an eight week session. Students chose interest areas and are placed accordingly into EC's with other students sharing common interests. These EC's are inquiry-based, which means that they are based on real world problem solving. The students will use high level thinking as they are involved in decision making, planning, and problem solving. The EC's have passed the "dinner table" test with students excited about learning and talking about their day at school with their families.
Self Assessment
Introduction

AdvancED's Self Assessment (SA) diagnostic is based on the AdvancED Standards of Quality, which serves as the foundation of the accreditation and continuous improvement process. The SA is a valuable tool for collaboratively engaging staff members and stakeholders in purposeful, honest dialogue and reflection to assess the institution's adherence to the Standards, and guide its continuous improvement efforts. The SA includes the institution's self-ratings of and the evidence cited for each of the indicators, comments that explain the indicator's ratings and an overall narrative for each Standard. The results of the SA are reviewed by the External Review Team as one essential component of the preparation process for the institution's External Review.
Standard 1: Purpose and Direction

The school maintains and communicates a purpose and direction that commit to high expectations for learning as well as shared values and beliefs about teaching and learning.

Overall Rating: 3.0

Reflect upon your responses to each of the indicators and performance levels by considering and responding to the following questions when drafting your narrative response. Use language from the performance level descriptions to guide your writing. Cite sources of evidence External Review team members may be interested in reviewing.

Pursuing charter status and implementing our new charter school helped this standard to be a strength. Our charter goals provide a common focus, shared values and beliefs, and improving student learning experiences. The areas of need include the goals of “always”, “consistently,” and ALL stakeholder groups working collaboratively and consistently. Professional learning has also become a strength due to our charter initiative, along with school-based leadership opportunities (School Improvement Team and Leadership Team)
Standard 2: Governance and Leadership

The school operates under governance and leadership that promote and support student performance and school effectiveness.

Use language from the performance level descriptions to guide your writing. Cite sources of evidence External Review team members may be interested in reviewing.

The noted strengths at MVES include: leadership policies and support practices are established; and supervision and evaluation are aligned and adjusted to improved professional practice and student success. Areas that need improvement are "measurable" active stakeholder participation, and leaders consistent communication to solicit feedback and respond to stakeholders. We will continue to monitor and analyze our student achievement to align with charter goals, TKES evaluations, and school improvement initiatives. We will strive to improve our methods of communication, to provide additional opportunities for stakeholder feedback, and to accurately measure active stakeholder participation (in addition to Student Council, PTO Board, Charter Governing Board).

### Indicator 3.3
Teachers engage students in their learning through instructional strategies that ensure achievement of learning expectations.

**Response**
Teachers sometimes use instructional strategies that require student collaboration, self-reflection, and development of critical thinking skills. Teachers personalize instructional strategies and interventions to address individual learning needs of groups of students when necessary. Teachers sometimes use instructional strategies that require students to apply knowledge and skills, integrate content and skills with other disciplines, and use technologies as instructional resources and learning tools.

**Evidence**
- Professional development focused on these strategies
- Examples of teacher use of technology as an instructional resource
- Examples of student use of technology as a learning tool
- Findings from supervisor walk-thrus and observations
- Surveys results
- Interdisciplinary projects
- TKES observations, PBL units, professional learning opportunities, lesson plans, data notebooks

**Rating**
Level 2

### Indicator 3.4
School leaders monitor and support the improvement of instructional practices of teachers to ensure student success.

**Response**
School leaders formally and consistently monitor instructional practices through supervision and evaluation procedures to ensure that they 1) are aligned with the school's values and beliefs about teaching and learning, 2) are teaching the approved curriculum, 3) are directly engaged with all students in the oversight of their learning, and 4) use content-specific standards of professional practice.

**Evidence**
- Curriculum maps
- Supervision and evaluation procedures
- Peer or mentoring opportunities and interactions
- Recognition of teachers with regard to these practices
- Surveys results
- Examples of improvements to instructional practices resulting from the evaluation process
- Administrative classroom observation protocols and logs
- Lesson plan checked during walk-throughs, data analysis meetings, TKES conferencing

The mission of MVES is to offer students extensive opportunities to build authentic learning experiences through project-based learning, best practice instruction, and using 21st Century cutting edge tools of technology. The school focuses on the 3 C’s for future college/career success: Collaboration, Communication, and Critical Thinking. Our charter has resulted in the following strengths reflected through achievement data and surveys: engaging families in meaningful ways, grading and reports, continuous professional learning.

All staff members participate in a continuous program of professional development that is aligned with the school's purpose and mission. School professional development sessions are carefully planned through surveys and evaluated by the School Improvement Team. The local PL sessions are conducted weekly and through Planned Release Time, each are structured for continuous, reflective, and purposeful professional development.

Areas to Improve/Weaknesses:
A formalized approach to mentoring, coaching and induction programs is needed to support instructional improvement consistent with the core values of our school. There is no formal structure for an adult advocate or other adult mentor other than the classroom teacher in place for students. Currently, there is no consistent school-wide practice to encourage student collaboration on instructional strategies and self-reflection. Exemplars and PBL rubrics are sometimes provided but this needs to be consistent throughout the school.

Actions to improve:
Our Leadership Team and administration will create a formalized mentoring, coaching, and induction program. Teacher leaders will be trained on how to implement the program and new participants will be given an evaluation instrument to provide critical reflection on the program.

The administration and counselor are implementing the "MVES Families" initiative to provide student advocacy and foster positive relationships with another adult in the building (besides the classroom teacher). The Mt. Vernon Exploratory School Community Families program will have every staff member be the leader of their own group (or "family") comprised of kindergarten through fifth grade students. These families will meet on a monthly basis starting in January 2015. Every student will be placed in a family and any students who transfer
in during the school year will be placed in a family to help make their transition easier. During the monthly meeting, staff members and students will build rapport with one another and establish an additional relationship at school with other students and an adult outside of their classroom teacher. The staff member will be another advocate for the child in the school setting and will keep up with the student throughout their educational career at Mt. Vernon. Students will stay in the same family until they leave Mt. Vernon.
**Standard 4: Resources and Support Systems**

The school has resources and provides services that support its purpose and direction to ensure success for all students.

Overall Rating: 3.14

Strengths: safe, clean, and healthy environment

The staff members at MVES maintain facilities, services and equipment to provide a safe and healthy environment. The school has a safety protocol and response team guidelines for emergencies included CPR trained staff and the Heart Smart team who are trained to use the AED and to respond to other emergency crises. MVES participates in inclement weather and fire drills. All visitors must check in with the front office with valid identification. Volunteers who work with children must complete a mandatory orientation and reporting training. Our staff also received extensive training from the GBI and local law enforcement for active-shooter situations. To maintain our areas of strength, we must continue to employ highly motivated and skilled custodians, school nurses, and reward them for their efforts. We need to continue our strong partnerships with our SRO and Sheriff deputies.

Weaknesses: equitable distribution of resources across system schools, evaluation of support services (effectiveness)

As our Special Education and Economically Disadvantaged populations continue to grow, additional resources will be needed. Material resources are limited through copy restrictions and less funding for consumable resources. With our increased use of technology, it is sometimes difficult to maintain hardware (projectors) and trouble-shoot technical issues when they arise.

To improve our areas of need, we will continue to seek outside funding sources (grants) for needed resources. We also need to research ways to evaluate the effectiveness of our support services (besides surveys).
## Standard 5: Using Results for Continuous Improvement

The school implements a comprehensive assessment system that generates a range of data about student learning and school effectiveness and uses the results to guide continuous improvement.

•Executive summaries to stakeholder groups (Charter Annual DOE reports, district reports, short-term action plans), School Improvement Team minutes, Charter Governing Board minutes, school website, school newsletter | Level 3 |

Reflect upon your responses to each of the indicators and performance levels by considering and responding to the following questions when drafting your narrative response. Use language from the performance level descriptions to guide your writing. Cite sources of evidence External Review team members may be interested in reviewing.

Areas of strength: collect and analyze data sources, maintain a clearly defined student assessment system.
MVES school personnel maintain and use multiple forms of data from multiple assessment measures, including locally developed and standardized assessments about student learning and school performance: Student Learning Objectives (SLOs), county-wide unit assessments, DRAs, CRCT scores, Calendar Math, OAS (GOFAR), and teacher informal assessments. All current and previous data analysis are stored on the local teacher "P" drive for easy access and reference when planning for student learning.

Areas in need of improvement: determine verifiable improvement in student learning with consistent student data.
Additional training for all faculty and support staff in the area of evaluation, interpretation, and use of data is needed to ensure continuous student improvement and the implementation of time and appropriate interventions. We will continue to analyze a range of data sources to provide trend and comparison data to guide our instruction. We need to find a healthy "balance" with student assessments and instruction.
Stakeholder Feedback Diagnostic
Introduction

The Stakeholder Feedback Diagnostic is designed to analyze the institution's survey results in terms of areas of achievement and areas that need improvement. Further, the diagnostic is essential to the accreditation and continuous improvement processes in that it provides the institution with a comprehensive view of the aggregate scores of the surveys administered, and the actual total of respondents for each survey type to derive a single score for this diagnostic. The performance level score computed at the completion of the diagnostic is used to broaden and enhance the external review team's understanding of the stakeholder's perceptions of the institution; the diagnostic should be used in the same manner by the institution as it engages in improvement planning.

Areas of Notable Achievement

Which area(s) indicate the overall highest level of satisfaction or approval?

Student and Parent surveys rated Standard 1 and Standard 4 and the highest. Staff surveys rated standard 1 and 2 as the highest. Indicators relate to safe environment and high academic standards.

Which area(s) show a trend toward increasing stakeholder satisfaction or approval?

Other survey data are not comparable in the type of questions with AdvancED. We do not have access to the QAR surveys that were given in 2009. Our Charter surveys contain questions that are more applicable to our charter goals (technology, collaboration, communication, and critical thinking among our students). Therefore, a trend is not measurable.

Which of the above reported findings are consistent with findings from other stakeholder feedback sources?

Charter surveys reflect satisfaction with:
Students- safe and caring environment,
Staff-school vision and focus, technology skills
Parent- student increase in technology skills, critical thinking, and collaboration
Areas in Need of Improvement

Which area(s) indicate the overall lowest level of satisfaction or approval?

Standard 3 for parents and staff surveys, Standard 5 for student surveys. Indicators are related to mentoring/coaching and differentiation.

Which area(s) show a trend toward decreasing stakeholder satisfaction or approval?

Other survey data are not comparable in the type of questions with AdvancED. We do not have access to the QAR surveys that were given in 2009. Our Charter surveys contain questions that are more applicable to our charter goals (technology, collaboration, communication, and critical thinking among our students). Therefore, a trend is not measurable.

What are the implications for these stakeholder perceptions?

There is a need to focus on a structured coaching/mentoring program for both new staff and one-to-one student/adult relationships. There is always a need to improve differentiation of instruction with limited number of teachers (as compared to Title I schools with more EIP, ESL, and Intervention teachers).

Which of the above reported findings are consistent with findings from other stakeholder feedback sources?

The only somewhat related survey items with weaker areas are different among the stakeholders: communication, quality of education.

Student Performance Diagnostic
Introduction

The Student Performance Diagnostic provides an institution with a process to report summative student assessments. This diagnostic is significant to the accreditation and continuous improvement process as it serves as a resource for schools to view content area assessment results required by the state, district, or other entities, determine the quality and reliability of the given assessments, and show the alignment of the assessments to the school's curriculum. The performance level computed at the completion of the diagnostic is used by the external review team as a comprehensive report to understand fully the institution's assessment program; the diagnostic should be used in the same manner by the institution as it engages in improvement planning.

<th>Response</th>
<th>Rating</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Assessment Quality</td>
<td>The array of assessment devices used by the institution to determine students' performances is sufficiently aligned so that valid inferences can be reached regarding students' status with respect to the majority of those curricular aims regarded as high-priority instructional targets. The documentation provided in support of this alignment is relatively persuasive. Most of the assessments used are accompanied by evidence demonstrating that they satisfy accepted technical requirements.</td>
<td>Level 3</td>
</tr>
<tr>
<td>2. Test Administration</td>
<td>All the assessments used by the institution to determine students' performances, whether externally acquired or internally developed, have been administered with complete fidelity to the administrative procedures appropriate for each assessment. In every instance, the students to whom these assessments were administered are accurately representative of the students served by the institution. Appropriate accommodations have been provided for all assessments so that valid inferences can be made about all students' status with respect to all of the institution's targeted curricular outcomes.</td>
<td>Level 4</td>
</tr>
<tr>
<td>3. Quality of Learning</td>
<td>Evidence of student learning promoted by the institution is acceptably analyzed and presented with reasonable clarity. In comparison to institutions functioning in a similar educational context, students' status, improvement, and/or growth evidence indicates that the level of student learning is at or above what would otherwise be expected.</td>
<td>Level 3</td>
</tr>
<tr>
<td>4. Equity of Learning</td>
<td>Evidence of student learning indicates achievement gaps exist among subpopulations of students, and these achievement gaps have noticeably declined.</td>
<td>Level 3</td>
</tr>
</tbody>
</table>
Areas of Notable Achievement

Which area(s) are above the expected levels of performance?

MVES continues to analyze data each year, storing all essential data on our "P" drive for all staff to access when needed. This data has helped us to reach conclusions regarding achievement or other related student learning results. The strengths we noted in our student performance were Reading and Language Arts.

Describe the area(s) that show a positive trend in performance.

Due to our charter and project-based learning, we see positive trends with student performance in science and social studies.

Which area(s) indicate the overall highest performance?

The areas of Reading and English/Language Arts are shown to be our highest student performance levels.

Which subgroup(s) show a trend toward increasing performance?

There are a few subgroups that show a trend toward increasing performance: 5th grade social studies, 4th grade science, and Hispanic social studies.

Between which subgroups is the achievement gap closing?

Our subgroups of English Language Learners and Economically Disadvantaged show the achievement gap is closing.

Which of the above reported findings are consistent with findings from other data sources?

We have reflected current achievement data above from CRCT results and CCRPI data. This data has continued to reflect an increase in science and social studies scores across the board.
Areas in Need of Improvement

Which area(s) are below the expected levels of performance?

There are a few areas where student performance is below the expected levels of performance: 4th grade math, 3rd grade math, 4th grade social studies, overall math scores continue to decline slightly (with the exception of 5th grade math).

Describe the area(s) that show a negative trend in performance.

There are a few areas that show a negative trend in student performance (with the understanding that student groups change from year to year, some of these groups still show growth): SPED, math scores across the board continue to decline (except 5th grade math).

Which area(s) indicate the overall lowest performance?

The areas of lowest student performance with regards to all achievement data: 4th grade math, 3rd grade math, 4th grade social studies, and SPED.

Which subgroup(s) show a trend toward decreasing performance?

There are two subgroups that show an inconsistent trend toward decreasing performance (considering student groups change each year): SPED, 4th grade math (more up and down, rather than trends).

Between which subgroups is the achievement gap becoming greater?

Our achievement gap scores from the CCRPI reports (2012 and 2013) indicated the gap was improving. Our ED/SWD/EL performance points improved from 2.2 to 2.8 from 2012 to 2013.

Our SWD students continue to perform significantly below other subgroups as well as all students.

Which of the above reported findings are consistent with findings from other data sources?

We are able to verify our data from RESA, the GaDOE, and our own local data analysis from sources such as CRCT scores, CCRPI data, Hall County unit assessments, DRA scores, and teacher input.
AdvancED Assurances
Introduction

AdvancED Policies and Procedures outline certain requirements that all institutions must meet in order to be in compliance. Institutions are required to verify whether or not they meet these requirements by answering a series of questions and in some cases, attaching evidence for review.

By responding to the questions in ASSIST and attaching evidence when required, the institution has verified whether it meets or does not meet each of the Assurances for Accreditation.
