Executive Summary
Introduction

Every school has its own story to tell. The context in which teaching and learning takes place influences the processes and procedures by which the school makes decisions around curriculum, instruction, and assessment. The context also impacts the way a school stays faithful to its vision. Many factors contribute to the overall narrative such as an identification of stakeholders, a description of stakeholder engagement, the trends and issues affecting the school, and the kinds of programs and services that a school implements to support student learning.

The purpose of the Executive Summary (ES) is to provide a school with an opportunity to describe in narrative form the strengths and challenges it encounters. By doing so, the public and members of the school community will have a more complete picture of how the school perceives itself and the process of self-reflection for continuous improvement. This summary is structured for the school to reflect on how it provides teaching and learning on a day to day basis.
Description of the School

Describe the school’s size, community/communities, location, and changes it has experienced in the last three years. Include demographic information about the students, staff, and community at large. What unique features and challenges are associated with the community/communities the school serves?

West Hall Middle School serves 868 students in grades 6 through 8. It is located in Hall County in Northeast Georgia and is considered a rural area just outside Atlanta metropolitan area. Our demographic breakdown includes the following: 47.2% of our students are Hispanic; 3.5% are Black or African American; 42.7% are White; 2.3% are Asian; the remaining 4.3% classify themselves as Two or more Races, Native Hawaiian, or American Indian. Our school has a 71% Free and Reduced Meals rate, and we are a Title I school. Our school is an accurate reflection of our community in ethnicity and socio-economic status. There are 75 certified staff members, including 1 Instructional Coach, 1 Media Specialist, 2 Counselors, 2 Assistant Principals, and 1 Principal. There are 31 classified staff members, including 11 Special Education Paraprofessionals and 1 Parent Liaison.

In the last three years, this school has experienced a rise in the number of students who receive free or reduced meals. We exceeded 70% in 2012 and were designated as a Title I school at that time. The Title I designation has brought much to our school in terms of resources, and the parent involvement requirement has increased the desire of our parents to be more active in our school. This has resulted in an increased interest from business partners in our community as well.

Four years ago, West Hall Middle School faced lagging standardized test scores. For the last three years, WHMS has intentionally focused on our instructional framework that provides the foundation for all instruction in the building. That has resulted in increased student achievement on both summative state-mandated standardized assessments and on local school formative benchmark assessments.
School's Purpose

Provide the school's purpose statement and ancillary content such as mission, vision, values, and/or beliefs. Describe how the school embodies its purpose through its program offerings and expectations for students.

West Hall Middle School's mascot is the Spartan.

We have embraced the following acrostic as our mission and vision that embodies our values and beliefs:

SPARTANS are Socially Responsible, Personally Accountable, Academically Motivated, Respectful of Myself and Others, Technologically Savvy, Achieving Excellence, Noble in Character, and Supportive of Positive Choices.

West Hall Middle School: a place where we engage students in academic challenges, encourage social growth, and celebrate individual worth.

We embody this purpose through offering a variety of programming to our students. We offer 11 different courses for high school (Carnegie) credits to our 7th and 8th grade students. Additionally, we have advanced content and gifted programming for advanced learners. Fragile learners are offered a range of services from math intervention to Read 180 for reading intervention to special education services when appropriate. Students are also offered the opportunity to be a part of a healthcare sciences cohort that prepares them, beginning in grade 6, for high school programming that can lead them to industry certification before they graduate high school. We also do local school benchmark assessments and summative unit assessments that are used to gauge student progress.

We recognize students for their academic progress and encourage them to set goals. In the 2013-2014 school year, we implemented an Advisement Program that is geared toward helping students set those goals. They meet twice per month with an adult in the building in small groups of 10-12 students. Every adult in the building (with the exception of those serving in our self-contained special education classrooms) has an advisement group. We have worked with students on knowing their current levels of performance, setting goals for their future achievement, and character development.
Notable Achievements and Areas of Improvement

Describe the school’s notable achievements and areas of improvement in the last three years. Additionally, describe areas for improvement that the school is striving to achieve in the next three years.

West Hall Middle School has achieved a great deal in that last three years. We have made gains in most academic areas, particularly Reading. In our 6th Grade, our achievement scores are as follows: Reading—96% pass rate (3 percentage points improvement since 2011); ELA—91% pass rate (a 4 percentage point improvement since 2011); Math—85% pass rate (a 20 percentage point improvement since 2011); Science—74% pass rate (a 10 percentage point improvement since 2011); Social Studies—79% pass rate (a 10 percentage point improvement since 2011). Our Hispanic subgroup has experienced steady growth while our special education subgroup has experienced a downward trend with the exception of Math (a 48 percentage point gain since 2011) and Social Studies (a 19 percentage point gain since 2011). In 7th Grade, our achievement scores are as follows: Reading—94% pass rate (a 10 percentage point improvement since 2011); ELA—94% pass rate (an 8 percentage point improvement since 2011); Math—90% pass rate (a 9 percentage point improvement since 2011); Science—83% pass rate (an 8 percentage point improvement since 2011); Social Studies—85% pass rate (a 9 percentage point improvement since 2011). With the exception of our special education subgroup in Social Studies, all subgroups have made steady (and often substantial) progress in all subject areas. In 8th Grade, our achievement scores are as follows: Reading—95% pass rate (a 4 percentage point improvement since 2011); ELA—91% pass rate (a 4 percentage point improvement since 2011); Math—77% pass rate (a 13 percentage point improvement since 2011); Science—63% pass rate (a 7 percentage point improvement since 2011); Social Studies—77% pass rate (a 9 percentage point improvement since 2011). With the exception of our special education subgroup in Reading, all subgroups have made steady (and often substantial) progress in all subject areas.

We attribute our steady gains to the intentional focus on the Instructional Framework (warm-up, mini lesson, work session, closing) that is implemented in all of our classes along with our continued efforts at improving the effectiveness of instructional technology in our classrooms.

We realize the need for continued focus on our English Language Learners and Special Education students in the areas of Math, Science, and Social Studies. This school year, we focused specifically on our 8th Grade Science achievement. There has been intentional development of the collaborative process among teachers to provide effective instruction. In the next three years, we will continue to focus on our ELL and SWD students’ progress on Math, Science, and Social Studies. The ACCESS test is also a good indicator of the progress of our ELL students that we monitor.
Additional Information

Provide any additional information you would like to share with the public and community that were not prompted in the previous sections.

Our Local School Council has been working in conjunction with our School Improvement Team to move in the direction of a Healthcare Sciences niche. Healthcare Sciences is one area that has opportunities for students with a variety of abilities and skills. The fragile learner can find a place as can the advanced learner. The options are nearly endless. We also know that healthcare is a field that will continue to have jobs as our population in the United States ages. The goal is to create a pool of students who have an interest in that industry who can seek certification in high school and those who would benefit from the International Baccalaureate Program at West Hall High School.

Our first step has been to add a second Healthcare Sciences teacher to our school so that we could create a cohort of students who will have an extensive foundation laid for them. While one teacher has yearlong classes at each grade level to build a knowledge base for those students who think that they may pursue a career in the Healthcare Sciences (HCS), the second teacher still offers the 9-week rotation class for HCS so as not to overload our Connections classes. The next step is to develop a team at each grade level that will consist of the cohort of students. This team would deliver the Common Core Georgia Performance Standards through the context of HCS. This will take time to develop the units, and the 2015-2016 school year is the goal for its implementation.
Self Assessment
Introduction

AdvancED's Self Assessment (SA) diagnostic is based on the AdvancED Standards of Quality, which serves as the foundation of the accreditation and continuous improvement process. The SA is a valuable tool for collaboratively engaging staff members and stakeholders in purposeful, honest dialogue and reflection to assess the institution's adherence to the Standards, and guide its continuous improvement efforts. The SA includes the institution's self-ratings of and the evidence cited for each of the indicators, comments that explain the indicator's ratings and an overall narrative for each Standard. The results of the SA are reviewed by the External Review Team as one essential component of the preparation process for the institution's External Review.
Standard 1: Purpose and Direction

The school maintains and communicates a purpose and direction that commit to high expectations for learning as well as shared values and beliefs about teaching and learning.

Overall Rating: 3.0

</table>
Reflect upon your responses to each of the indicators and performance levels by considering and responding to the following questions when drafting your narrative response. Use language from the performance level descriptions to guide your writing. Cite sources of evidence External Review team members may be interested in reviewing.

1.1 West Hall Middle school has established a strong mission statement that is a place where we engage students in academic challenges, encourage social growth and celebrate individual worth. Our mission statement is displayed in our school handbook and stakeholders are involved in the decision making process with the purpose of achieving our mission as its goal. The school's mission statement was developed through a combined effort of the School Improvement team (SIT), School Leadership Team (SLT), faculty and parent liaisons. Furthermore, our mission is translated through a Spartan acrostic that is displayed prominently in the classrooms for all students and staff. The acrostic contains:
Socially responsible
Personally Accountable
Academically motivated
Respectful of myself and others
Technologically savvy
Achieving excellence
Noble in character
Supportive of positive choices
Moreover, every teacher is on a committee which makes everyone a stakeholder and strengthens our commitment to shared values about teaching.
On the other hand, improvements could be made in communicating the purpose and direction by posting the mission statement in more visually conspicuous areas such as the school website, front office, classrooms and hallways. We could further enhance our mission by incorporating an annual review to help ensure input from all stakeholders.

1.2 West Hall Middle School utilizes numerous methods to develop and maintain a profile of its students and community to effectively implement the goals identified at the school. Multiple accountability documents are in place to track student progress in meeting goals. Standardized assessment data are gathered to address achievement levels and needs. Parents and community leaders attend open house meetings and curriculum night to gain knowledge and assist in working together to enhance and improve the quality of education for all students. Suggestions of the stakeholders are monitored from surveys collected. Information concerning events, activities, programs, academic progress, accomplishments, and accolades are reported through school and county-wide newspaper articles. Staff members are emailed handbooks during pre-planning to document the school's policies and procedures. Students were provided an agenda which contained all county policies, procedures and standards during the first week of school.
Improvements include: creating parent expos to further knowledge and encourage parent/student involvement to increase student learning.

1.3 All activities and programs at West Hall Middle School revolve around its purpose. The administration meets with the faculty and staff on an as needed basis to ensure that a shared responsibility and school focus is communicated. Staff meetings are held to ensure that the school's goals are guiding the educational process. The school administrators participate in the district's annual summer leadership training that serves as a tool for ongoing professional development. A professional learning committee evaluates, develops and implements suggestions for PLU's.
Improvements include: aligning our school's goals and expectations with our feeder high schools. To ensure that the direction and purpose of West Hall Middle School remains current and aligned with state and district expectations, we should include the goals in an annual school improvement plan. The school improvement plan should reflect data gathered from parent, staff and student surveys as well as feedback gathered at department, grade level, and school leadership meetings.
### Standard 2: Governance and Leadership

The school operates under governance and leadership that promote and support student performance and school effectiveness.

Overall Rating: 3.0

| 2.3       | The governing body ensures that the school leadership has the autonomy to meet goals for achievement and instruction and to manage day-to-day operations effectively. | The governing body protects, supports, and respects the autonomy of school leadership to accomplish goals for improvement in student learning and instruction and to manage day-to-day operations of the school. The governing body maintains a distinction between its roles and responsibilities and those of school leadership. | • Roles and responsibilities of school leadership  
• School improvement plan developed by the school  
• Stakeholder input and feedback  
• Communications regarding board actions | Level 3 |
Reflect upon your responses to each of the indicators and performance levels by considering and responding to the following questions when drafting your narrative response. Use language from the performance level descriptions to guide your writing. Cite sources of evidence External Review team members may be interested in reviewing.

Strengths: Governance and Leadership is an area of strength for West Hall Middle School. The stakeholders of our school rated the indicators of this standard highly which states, "The school operates under governance and leadership that promote and support student performance and school effectiveness."

Responses from the stakeholders clarify the strength of the leadership that encourages growth for all. Evidence of this is in our responsibly led and fairly governed administration. Encouragement and high expectations are enforced by allowing opportunities for stakeholder input and keeping everyone informed on most decisions. The governing body encourages innovation and collaboration that results in the staff's desire to continue to seek high expectations for our students' well-being and success.
Actions to sustain areas of strengths: In an effort to maintain our areas of strength, WHMS will continue the expectations of growth and success in all stakeholders. Collaboration groups, that include content areas, grade levels, and school wide meetings, are supported by the leadership team, and will remain in place. These meetings are found to be a strong point for all stakeholders, as they feel included in the decision-making process in the school.

Areas of Improvement: Because the Standard of Governance and Leadership was rated highly with our participating stakeholders, there were few points of discussion considered in areas of improvement. However, one indicator was looked at more closely in our desire to improve. We looked at indicator (2.6): supervision and evaluation processes result in improved professional practice and student success. With the mandated TKES process, it is difficult to look at every stakeholder's complete contribution. In cases of paraprofessionals and non-certified staff, processes to define areas of communication and needs can be more difficult than with those with the standard evaluation tool. Stakeholders feel that the present process, which does not include all non-certified stakeholders, is not working in all areas of the professional practices that result in our students' success.

Actions to improve areas of need: In an effort to include ALL stakeholders in the process of communication and learning opportunities, the Leadership team will collaborate to create an evaluation system that provides consistency, constructive, and positive feedback between all parties. This would open the communication for possible PL opportunities in areas of improvement for everyone. This tool would focus on the area of providing effective instruction to all students.
### Standard 3: Teaching and Assessing for Learning

The school's curriculum, instructional design, and assessment practices guide and ensure teacher effectiveness and student learning.

**Overall Rating:**  2.5

<table>
<thead>
<tr>

Reflect upon your responses to each of the indicators and performance levels by considering and responding to the following questions when drafting your narrative response. Use language from the performance level descriptions to guide your writing. Cite sources of evidence External Review team members may be interested in reviewing.

Supported by school leaders, collaborative learning communities foster effective teaching through vertical and horizontal alignment and revision of practices in curriculum, instruction, and assessment. Student work samples and common assessments are utilized in collaborative discussions to differentiate in lesson planning and instructional strategies by providing acceleration, remedial support, and other unique opportunities for student learners (i.e., advanced course placement, Read 180, RTI, SPED, ESOL). Teachers communicate attendance and academic performance of student learners with families (i.e., Infinite Campus, graded work, grading reports). Professional learning opportunities utilize the talents of in-house teachers to deliver needs identified by the faculty and staff (i.e., Writing in the Content PLU, Educational Technology PLU, Techy Jeanius PLU). These current strengths will continued to be sustained through: continued collaborative learning communities and discussion of student work and common assessments, utilization of in-house teachers as resources in providing faculty- and staff-identified professional development, inclusion of parents in the learning process, and identification of student needs and creation of corresponding support systems/programs.

While efforts are made to provide and coordinate support services to the unique needs of students, consistency in rigor is needed to support our higher achieving student learners and maximize the potential of all learners. While efforts are made to involve parents the education process, optimum parental involvement has not been reached. To improve identified areas of growth, the school has implemented an advisement program which involves school personnel building strong relationships with students; gaining insight into their individual needs regarding learning skills, thinking skills, and life skills; and serving as a student learner advocate. Professional learning opportunities being offered are inclusive of rigor and differentiation strategies to maximize the potential of all learners.
Standard 4: Resources and Support Systems

The school has resources and provides services that support its purpose and direction to ensure success for all students.

Reflect upon your responses to each of the indicators and performance levels by considering and responding to the following questions when drafting your narrative response. Use language from the performance level descriptions to guide your writing. Cite sources of evidence. External Review team members may be interested in reviewing.

**AREAS OF STRENGTH:**
The committee found strengths at WHMS to be Students and school personnel use a range of media and information resources to support the school's educational programs(4.4) and that qualified personnel support the school's purpose, direction, and the educational...
The faculty and school leadership team ensures that Instructional time is protected and valued. WHMS strives to offer new resources and support systems. The Title 1 funds have supported this initiative and made it possible. The WHMS counselors offer student support programs, such as SWAT team and Power team. WHMS students are engaged throughout the year in classroom guidance, career exploration and health awareness. Our students have 9 athletic teams and 16 extracurricular clubs to choose from and participate. Our Eighth grade females are involved in a Girl's Empowerment Day each year.

**ACTIONS TO SUSTAIN AREAS OF STRENGTH:**
In order to sustain growth in providing support services to meet the needs of our student population, the counselling department will continue to maintain educational and career planning, and will enhance these programs by adding a Peer Helper and Mentorship program.

**AREAS IN NEED OF IMPROVEMENT:**
The committee identified weaknesses in the area of technology infrastructure that supports the school's teaching, learning, and operational needs (4.5), the maintenance of facilities, services, and equipment to provide a safe, clean, and healthy environment for all students and staff (4.3).

**PLANS TO IMPROVE:**
To improve our student and school personnel use of technology (4.4 and 4.5), the committee recommends school-wide training on Canvas Integration, Google Drive, and Office365. The custodial services in our building are provided by the school district through a privately contracted company. There have been significant issues with the quality of the work, and the principal works with district and company representatives to address the issues. The resolution is usually short-lived, and the process is repeated again and again.
Standard 5: Using Results for Continuous Improvement

The school implements a comprehensive assessment system that generates a range of data about student learning and school effectiveness and uses the results to guide continuous improvement.

Overall Rating: 2.6

• Training materials specific to the evaluation, interpretation, and use of data | Level 2 |
Teachers and support staff continuously demonstrate relative strengths in the use of data to inform instruction. Stakeholders collect and analyze data from a range of sources including standardized tests, class assessments, and teacher observations to place students in appropriate learning environments that are varied (advanced/remedial classes, co-taught environments, differentiated classroom settings, resource classes, and high school level connections classes). Teachers often use planning time to work with "bubble" (or marginal) students. Teachers from various content areas collaborate to evaluate data and support student learning, and the school's leadership team consistently gathers and analyzes achievement using common benchmark assessments to inform curricular decisions.

However, distinctive improvements regarding the use of data to inform instruction are certainly needed. Specific times/days should be established regularly for stakeholders to more fully analyze student assessments to foster a wider range of differentiation across content areas. Teachers and support staff need diverse professional development to further provide diverse learning opportunities for students at all levels extending beyond basic remediation. Future professional development should extend to educating/understanding the unique learners at West Hall Middle School (socio-economically disadvantaged students, Latino learners, ELL students, "at-risk" students) to ensure that learning environments are both rigorous and academically sound.

Stakeholder Feedback Diagnostic
Introduction

The Stakeholder Feedback Diagnostic is designed to analyze the institution's survey results in terms of areas of achievement and areas that need improvement. Further, the diagnostic is essential to the accreditation and continuous improvement processes in that it provides the institution with a comprehensive view of the aggregate scores of the surveys administered, and the actual total of respondents for each survey type to derive a single score for this diagnostic. The performance level score computed at the completion of the diagnostic is used to broaden and enhance the external review team's understanding of the stakeholder's perceptions of the institution; the diagnostic should be used in the same manner by the institution as it engages in improvement planning.

Areas of Notable Achievement

Which area(s) indicate the overall highest level of satisfaction or approval?

Staff surveys indicate the overall highest level of satisfaction or approval. There are no statistical outliers in our data. However, the staff rates Standard 1 (Purpose and Direction) as our highest area. Parents rate Standard 4 (Resources and Support Systems) as our highest area, and students rate Standards 1 and 3 (Purpose and Direction and Teaching and Assessing for Learning) as our highest area.

Standard 1: Strength - Students, staff and parents understand that the school's leadership implements a continuous improvement process that provides clear direction for improving conditions that support student learning.

Standard 2: Strength - All stakeholders understand that school staff wants to see them do their very best. There are many opportunities for stakeholder involvement and the school leadership promotes a collaborative culture.

Standard 3: Strength - Staff and Parents are confident that the school has a way for each student to be well-known by at least one adult advocate.

Standard 4: Strength: Technology is mentioned as strength of our school. Parents and staff agree that our school's facilities/environment are safe and support learning.

Standard 5: Strength: Parents and students feel that children are well prepared for the next grade.

Which area(s) show a trend toward increasing stakeholder satisfaction or approval?

Standard 1 (Purpose and Direction) is our trending area of increased stakeholder satisfaction or approval.

Which of the above reported findings are consistent with findings from other stakeholder feedback sources?

The staff members are the only group who have rated our vision and mission (Purpose and Direction) in past surveys. At our last GAPSS review, this area was noted by staff members as something that needed to be improved. These survey data indicate that we have improved in this area.
Areas in Need of Improvement

Which area(s) indicate the overall lowest level of satisfaction or approval?

There are no statistical outliers in our data. Staff members rated Standard 3 (Teaching and Assessing Learning) as our lowest area. Parents rated Standard 2 (Governance and Leadership) as our lowest area. Students rated Standard 4 (Resources and Support Systems) as our lowest area.

Which area(s) show a trend toward decreasing stakeholder satisfaction or approval?

There is no trend toward decreasing stakeholder satisfaction or approval. Each stakeholder group identifies a different area of relative weakness.

What are the implications for these stakeholder perceptions?

The implication is that no one next step will address the needs of the different stakeholder groups. This will require a deeper analysis of the indicators within each standard so that we can establish multiple goals to meet the needs of our stakeholders. Another implication is that we may need to communicate better about specific parts of our school programming.

Standard 1: There is a need for a formal review and revision of our purpose statement involving all stakeholders.

Standard 2: Students believe that leadership and staff should work to foster a culture more consistent with the school’s purpose and direction.

Standard 3: Students and Parents feel that teachers could do better in engaging students in instructional strategies.

Standard 4: Staff indicated that the school may not have sufficient infrastructure (wireless access is noted) to support the hardware that we have in abundance.

Standard 5: Students and Parents are not satisfied that student progress is thoroughly monitored and reported to stakeholders.

Which of the above reported findings are consistent with findings from other stakeholder feedback sources?

None.

Student Performance Diagnostic
Introduction

The Student Performance Diagnostic provides an institution with a process to report summative student assessments. This diagnostic is significant to the accreditation and continuous improvement process as it serves as a resource for schools to view content area assessment results required by the state, district, or other entities, determine the quality and reliability of the given assessments, and show the alignment of the assessments to the school's curriculum. The performance level computed at the completion of the diagnostic is used by the external review team as a comprehensive report to understand fully the institution's assessment program; the diagnostic should be used in the same manner by the institution as it engages in improvement planning.

</table>
Areas of Notable Achievement

Which area(s) are above the expected levels of performance?

Considering the high number of economically disadvantaged students at WHMS, the gains that we have noted in Reading in all subgroups (with the exception of our English Language Learners in 7th and 8th grades) are above what might be expected.

Describe the area(s) that show a positive trend in performance.

Positive trends in performance are listed below:

6th Grade:  Reading, Math, Science, and Social Studies for all groups with the exception of Students with Disabilities.

7th Grade:  Reading, ELA, and Math for Students with Disabilities

8th Grade:  All subjects, all subgroups

Which area(s) indicate the overall highest performance?

The highest overall performance came from our 8th grade students in the area of Science (all subgroups).

Which subgroup(s) show a trend toward increasing performance?

Our English Language Learners in 6th and 8th grades are showing a trend in increasing performance.

Between which subgroups is the achievement gap closing?

The achievement gap is closing somewhat between our Hispanic and White students.

Which of the above reported findings are consistent with findings from other data sources?

All are consistent.
Areas in Need of Improvement

Which area(s) are below the expected levels of performance?

Our Students with Disabilities and our English Language Learners scores in the areas of Math, Science, and Social Studies are below expected levels of performance.

Describe the area(s) that show a negative trend in performance.

Our Students with Disabilities and our English Language Learners scores in the areas of Math, Science, and Social Studies show a negative trend in performance in all grade levels.

Which area(s) indicate the overall lowest performance?

Our Students with Disabilities in 6th grade Science and Social Studies have the lowest overall performance.

Which subgroup(s) show a trend toward decreasing performance?

Our Students with Disabilities and English Language Learners in 6th and 7th grades show a trend toward decreasing performance in Science and Social Studies.

Between which subgroups is the achievement gap becoming greater?

The achievement gap is not becoming greater between/among any subgroups.

Which of the above reported findings are consistent with findings from other data sources?

All are consistent.
AdvancED Assurances
Introduction

AdvancED Policies and Procedures outline certain requirements that all institutions must meet in order to be in compliance. Institutions are required to verify whether or not they meet these requirements by answering a series of questions and in some cases, attaching evidence for review.

By responding to the questions in ASSIST and attaching evidence when required, the institution has verified whether it meets or does not meet each of the Assurances for Accreditation.
