Accessing the Campus Web Application from Mobile/Tablet Devices

While we work to add additional mobile/tablet friendly interfaces, feel free to use your tablet to access the Campus web application. Please note there are some Campus features which use Java or Flash which aren't supported on today's mobile operating systems. Also, if issues arise we will do our best to fix any problems which keep the web application from working.

Due to the numerous inconsistencies among the mobile and tablet operating systems, devices, and browsers, Infinite Campus does not officially support the use of the Campus web application (with the exception of Control Center and Campus Student) on mobile devices and tablets.

Users can access Campus Portal information on Apple and Android devices using the Campus Mobile Portal App. See the [Campus Mobile Portal](#) article for more information.
