

# COVID-19 Vaccine & Kids

LONGSTREET CLINIC  
FACEBOOK LIVE

MAY 25, 2021 AT 6 P.M.

The COVID-19 vaccine recently gained approval for children 12 and older, and vaccination of adolescents in our community is underway. However, we recognize that the vaccine must also earn what could be argued is the most important seal of approval of all - parents!

Join us on Facebook Live as representatives of the Community COVID-19 Vaccine Coalition including:

**Dr. Saima Hussain,**  
Longstreet Clinic  
Pediatrician

**Dr. Megan Farley,**  
Longstreet Clinic  
Pediatrician

**Dr. Supriya Mannepalli,**  
Northeast Georgia Health  
System's Medical Director  
for Infectious Disease

**Dr. Zachary Taylor,**  
Georgia Department of  
Public Health's District 2  
Medical Director

*Representatives from local school systems will also participate.*

Together they'll answer the most common questions they are hearing about the COVID-19 Vaccine and kids so parents can make informed decisions for their families. In addition, representatives from our local school systems will join to answer questions about how vaccines may impact school and activity attendance and quarantining.
