

Hall County School District

Your District Believes Parents/Guardians are the primary educators of their children

In the coming months, we will solicit your input in areas we believe are important in striving to have a strong relationship with our families:

1. Regular notification of rights empowers active participation.
2. Right to choose placement among all of our schools and programs that have space
3. Right to decide who can discuss distinctly personal information with your child
4. Right to open communication
5. Right to challenge assignments and resources that may be counter to parental beliefs, providing alternative assignments when practical.
6. Right to transparency (no secrets)
7. Right to protection of student data

Will Schofield, Superintendent
